Ensuring an extra life to your Network

Oxygen - Cutting-edge Information Technology Solutions

We at Oxygen fully understand the dynamics of the business and enables clients to transform themselves to embrace the future! Our new generation solutions helps companies liberate themselves from the expensive and inconvenient systems of the past. We blend technology, innovation and relationships and thereby create solutions which are extremely user friendly.

“Revelutionary solutions that could dramatically reshape the way modern Business is managed”

OUR OFFERINGS

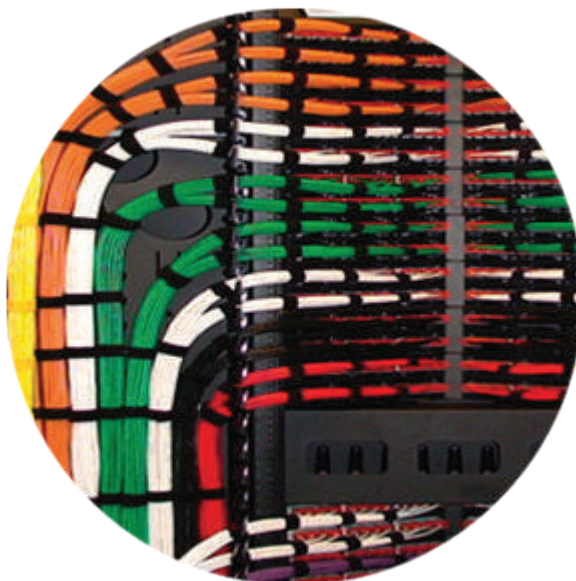

Structured Cabling - Copper & Fiber
LAN & WAN Network Solutions
CCTV, Access Control & Security Systems
Telephone PBX Solutions
Enterprise Wireless Solutions
Data Center Preparation
Server Management of all Platforms
Network Security and Firewall
ERP & Application Development
Website Development
Mail Marketing Solutions
Graphic Design
Annual Maintenance Service
Oil & Gas Services

Structured Cabling Copper & Fiber

Oxygen is a pioneer among Copper & Fiber optic cabling companies offering numerous Data & Telecom services. We offer finest fiber optic cabling & Fusion Splicing services to small or large organizations. Our experienced technicians can handle the installation of networks of any size & scale observing highest industry standards. Companies seeking high speed data transfer turns to us because of our excellent record in fiber optic cabling and network designing which is provided complete with all certification requirements.

Our Services include:

- UTP/STP Structured Cabling System
- Conduit & Cable Tray System
- Designing of Fiber Optic Networks
- Copper & Fiber Cable Supply
- Fiber Spicing
- OTDR & Fluke Tests
- Installation of Racks
- Cooling Systems

LAN & WAN Network Solutions

Oxygen offers hardware support irrespective of the environment and size of the enterprise. We supply, configure & optimize Network Switches, Routers, Firewalls, UPS Systems, Servers, Desktops, Laptops, data centers & Printers. In addition to this we also supply & install Traditional & IP PBX Systems, Biometric Attendance, Access Controls and Security Cameras. We have a well experienced team of hardware engineers & technicians providing on-site support and well-equipped workshop to carry out the repairs.

Telephone PBX Solutions

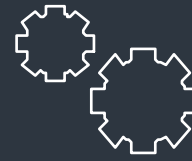

Oxygen tied-up with international brands of telecommunication systems for providing complete building unified communication solutions. We also integrate project-specified brands from project to project in order to give the best solutions to the clients.

CCTV, Access Control & Security Systems

Our intelligent video surveillance solution provides a complete system including an integrated control platform, fully automated intelligent monitoring with high definition IP Cameras including wireless remote monitoring capabilities in a turnkey solution. Various behavior recognition modules such as Crowd Detection, Exit Lane (controls entrance and exit lines),

Human & Vehicle tailgating/Piggybacking, Loitering, Number Plate Recognition, Footfall Counting, Perimeter Intrusion, Removed Objects, Unattended Objects, Stopped Vehicle, Turnstile Violation etc.

IT INFRASTRUCTURE

- Mobile Applications

Enterprise Wireless Solutions

Oxygen is one of the forerunners in designing, delivering and deploying innovative broadband wireless access solutions with more than 5 years of experience in Data & Voice Solutions. We've deployed some of the best wireless networks in the UAE, bringing voice and broadband data service to hundreds of users.

Our Main Applications are:

- Point to Point Applications
- Point to Multipoint & Any points to Any Points
- Outdoor Wi-Fi Carpeting
- Wi-Fi hot spots inside buildings and offices

Datacenter Preparation

We offer comprehensive data center consultancy services right from the business feasibility, planning and modeling steps, design concepts, platforms, location and site selection all the way to, designing, engineering and planning of Structured Cabling, CCTV, Access Control, Network, Security, Systems, Storage, Software Applications, Precision Cooling, UPS, ATS, Generators, Electrical, EMS, Fire suppression and Prevention, Leak Detection etc.

Precisely, our Datacenter services include:

- Raised Flooring
- Cooling Systems
- UPS Systems
- Fire Suppression System
- Water Detection
- Environmental System

Server Management & Virtualization

We supply servers and its accessories irrespective of the environment and size of the enterprise. We have experienced and qualified engineers who can install configure and migrate microsoft and linux servers for any environments including application management, web and mail management

Virtualization dramatically improves the efficiency and availability of resources and applications in your organization. Through Virtualization, we run multiple operating systems on a single computer which can capital costs by increasing energy efficiency and requiring less hardware and increasing your server to admin ratio and building up business continuity through improved disaster recovery solutions and deliver high availability throughout the data center

Network Security & Firewall

Oxygen delivers VPN solutions to extend the reach of corporate resources into branch offices, subsidiaries and remote users. Through an in-depth understanding of our client needs we are able to provide comprehensive and cost effective managed or unmanaged solutions. We provide reliable & secure solutions on a converged network that integrate fixed, mobile and remote locations.

Data Migration

We have experts in our team who can provide data migration for data centers including applications, servers and physical shifting of equipment. Oxygen is capable of providing maintenance service for complete physical data center management with core elements including cooling, raised flooring, UPS, generators, racks, fire suppression systems and water detection.

ERP & Application Development

Our business commences and ends with the client. Every stage of implementation - from analyzing the client requirements, selection of appropriate solution, to implementation, training and after sale support is closely monitored and managed by our team of highly talented professionals. With an optional mix of local and international support resources, Oxygen stands as a leading provider of I.T services and solutions.

The solutions include:

- ERP solutions for large Enterprises
- Hotel and Hospital management software
- Solutions for Universities & Colleges
- Web based Doc. management systems

Web Development

Access world class services, solution, assistance and widen your extended capability. We have a well-established team of dedicated developers with years of experience that illustrates quality, dedication, innovation and reliability. We have a unique combination of experienced based team seamlessly will enable you with your complete development and direct control of your ongoing projects which will result in desirable outcomes. We promise guaranteed monitoring with 100% confidentiality and related agreements to deliver fully secured solutions. We have a pool of experienced & skilled professionals who can work full time for your project on the following languages and platforms:

- | | | |
|------------------------|--------------------------|---------|
| • Coldfusion Developer | • E-commerce Development | • JSP |
| • ASP.NET | • Java | • MySQL |

Mail Marketing Solutions

Oxygen is your direct mail production and transmitting partner and with industry experience and using latest technology, we are able to keep up close eyes on every mailing campaigns, the way a real partner deliver, which enables you to stay focused on your business. We have been providing innovative mail storage and transportation solutions, as well as mailing supply solutions to both large and small business across the world, since 2006. We are proud of ourselves on our customer service and the timely delivery of your needs.

Oil & Gas Services

Oxygen has a treasure of knowledge and expertise and reputation as a leading provider of safety explosion protection devices and systems, partnered with global leading manufacturers for use in process control applications. We can supply a full range of industrial grade Ethernet products to satisfy the most demanding process applications. Our rugged Ethernet range is designed to operate in the harsh and hazardous process control environment and features multi-port switches, fiber converters and giga-bit connectivity. Apart from supply, we integrate and support these devices in Oil and Gas field including offshore operation areas.

Annual Service Contracts

The ultimate aim of the Oxygen team is to offer complete peace of mind to our clients. The kind of support offered by us through our Annual Maintenance/ Service Contracts (AMC) enables our clients to focus absolutely on their core businesses.

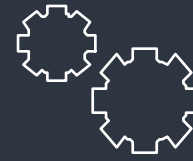

Our trained Engineers are well equipped to restore any IT Infrastructure back to its normal working condition within the least lead-time. We are providing AMCs with different options to suit different class of customers. Our highly skilled engineers install, maintain and repair Windows-based Servers & PCs, Linux Based Servers, Macintosh computers, terminals, modems, and network connections. We provide on-site, off-site and online support based on the situational requirement.

Our Annual Service Contract will ensure the following:

- Attend service calls within the shortest time duration
- Repair/replace the defective hardware components.
- Do preventive maintenance check twice in a month
- Optimize the settings for efficient performance
- Checking for virus, along with Preventive Maintenance.
- Emergency Services – On Call
- Checking & Optimization of LAN & WLAN & Printers

AMC may be categorized as:

- Comprehensive - we provide service and repair/replace the defective parts at our cost.
- Service only - we provide service only.
